

NUTRIFIZZ®

FOR AN OPTIMAL FLUID AND SALT BALANCE

Nutrifizz® is an effervescent tablet for optimal fluid and salt balance for young calves. Nutrifizz® includes a combination of 50% pharmaceutical lactose, essential minerals, pro-biotics, and an organic acid which gives Nutrifizz® unique characteristics.

The advantages of Nutrifizz®

- Gives the animals an energy boost by lactose.
- Stabilises and restores the salt balance.
- Supports the intestinal flora.
- Helps prevent dehydration.
- Supports recovering after diarrhea.

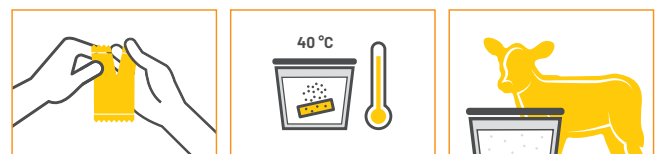

Nutrifizz®, more than an electrolyte

- The tablet dissolves rapidly into a tasty drink for a good intake by the animals.
- Both preventive and curative use:
 - Preventive: during transport, at reduced resistance, and at group housing, group changes, and group translocations.
 - restores fluid balance in case of diarrhea.
- Due to the hygienic packaging (per tablet) and precise dosage no waste of product.

Nutrifizz® is packed in boxes of 42 tablets, every single tablet is sealed, to guarantee 2 years of shelf life, ease of use, and hygiene.

How to use

- For additional energy boost and support of the resistance: dissolve 1 tablet in 1L of lukewarm water (40°C). Once a day, at least 2 hours after the first feeding.
- At first signs of diarrhea/dehydration: dissolve 2 tablets in 2L of lukewarm water (40°C). One-time administration instead of milk. Thereafter, start building up milk feedings again.
- Nutrifizz® can be used starting from 3 days after birth until after weaning.
- Administer immediately after dissolving, feed at 37°C.

*In case of serious diarrhea/faecal disorder and dehydration:
Consult your veterinarian.*
